**staunchRobots**  
WE MAKE RAILS APPS

---

**OBJECTIVE:** To build beautiful applications that are simple yet have a bold impact.

**Experience:** 5 years Rails. 10 years in web development

**Skills:** Ruby, Rails, jQuery, CSS, Unix Administration, Linux Administration, Git, TextMate, MongoDB, Solr, Sphinx, SOAP, XML, REST, XML-RPC, EventMachine, Haml, Shopify, Magento, Image Magick, Ghost Script, PDF and image manipulation via Ruby or Bash, Network Programming and much more.

\* Adding new skills all the time, I always welcome a challenge.

---

## RECENT CLIENT WORK:

<http://ordercup.com> Senior Developer and one of the first developers on the scene developing the worlds “first web based shipping system”.

<http://stocktwits.com> Had a blast building the ecommerce platform for the first social stock and financial sharing network. Lead a subproject that was called chart.ly .

<http://katiesdaylightdonuts.com> CTO and Lead Developer – Built a donut delivery system with PDF invoice printing and complex drag drop routing system for delivery trucks. This site included a mobile integration allowing drivers to update the system remotely.

---

## LEARNING / TOP OPEN SOURCE CONTRIBUTIONS / TOP PERSONAL PROJECTS

- <http://apps.shopify.com/metarific>. Personal Project: A simple SEO tool for the Shopify platform.
- <http://niceinvoice.com>– Personal Project: A simple invoice printing and system for the Shopify ecommerce platform. Will be in app store soon.
- <https://github.com/timmatheson/shipsurance> OSS Gem to integrate with a lead shipping insurance provider Shipsurance.
- <https://github.com/timmatheson/Tenderize> OSS Gem to integrate with the Tender ticket system api
- <https://github.com/timmatheson/Magento> Created the “first” Magento ruby gem completely Open Source and free.
